Damien MARTINS- -ALONSO

Profile

As an engineering student at ENSEEIHT who came from a preparatory class, I am passionate about system design and control. I am looking for an operator internship in the aerospace industry to gain hands-on experience on the production line and clarify my career goals.

Languages

- Français : **Native**
- Anglais : **B1**
- Espagnol : **B1**

Skills

- **Programming languages :**

Python - SQL

- **Software :**

FL Studio - SiriL - Pixinsight - Suite Adobe

Damien MARTINS--ALONSO

Education

Engineering Degree — *Since 2026*

ENSEEIHT - SN

Engineering School, expected graduation in 2029

Preparatory Class for the Grandes Écoles — *2024 - 2026*

Descartes High School, Montigny-le-Bretonneux (PCSI)

Jules Ferry High School, Versailles (PSI)

Experience

Butcher Shop — *2024-2025*

- Cashier duties at a butcher shop.
- Greeting customers and managing customer flow during peak hours.
- Developing interpersonal skills, financial discipline, and the ability to work effectively under pressure.

Chantier Jeunes — *2023*

- Selection based on a motivational interview to participate in a one-week community service project for the municipality.
- Performing manual renovation and maintenance work (painting road markings, varnishing street furniture, cleaning) during full days under the supervision of municipal employees.
- Development of teamwork skills, a sense of civic engagement, and attention to detail in following technical instructions.

Observation Internship — *2019*

Bakery and Pastry Shop, Bièvres

- Exploring the world of craftsmanship and how a business operates during the 9th-grade work experience program.
- Immersion in the team's daily routine, including early morning shifts (7 a.m.–2 p.m.), observing and participating in the various production cycles in the bakery and pastry shop.
- Raising awareness of the physical demands of the workplace (standing for long periods, repetitive tasks) and the importance of teamwork.

Project

Design of a Miniature Equatorial Mount — *2025-2026*

- **Mechanical and dynamic modeling :** study of Earth rotation compensation and management of machining stresses.
- **Development and control (Arduino)** Integration of light sensors and image processing via a camera module for precise tracking.

Interests

Music
Piano (beginner)

Football
Regional Competitions

Astrophotography
Photography of nebulae, galaxies, comets, etc.
